The diagram illustrates the 8 steps of the furniture production process in a circular flow:

- DESIGN**: Initial planning and sketching of the furniture piece.
- MATERIAL SELECTION**: Choosing the appropriate wood or material for the design.
- CUTTING**: Precision cutting of the selected material into required shapes.
- DRYING**: Natural or artificial drying of the cut wood to prevent warping.
- MACHINING**: Shaping and smoothing the wood pieces using various tools.
- ASSEMBLY**: Joining the individual components together to form the structure.
- PAINTING AND COATING**: Applying finishes, stains, or paints for protection and aesthetics.
- PACKAGING**: Wrapping and securing the finished furniture for transport and sale.
