The diagram illustrates the 8 steps of the wood packaging process in a circular flow:

- DESIGN**: Represented by a circular image showing a 3D wireframe model of a wooden crate with internal dividers.
- MATERIAL SELECTION**: Represented by a circular image showing a close-up of various wood planks and boards.
- CUTTING**: Represented by a circular image showing a wood cutting machine with a blade cutting through a piece of wood.
- DRYING**: Represented by a circular image showing a large stack of dried wood planks.
- MACHINING**: Represented by a circular image showing a person's hands working on a piece of wood on a workbench.
- ASSEMBLY**: Represented by a circular image showing a person's hands assembling wooden components.
- PAINTING AND COATING**: Represented by a circular image showing a person's hands applying a coating to a wooden surface.
- PACKAGING**: Represented by a circular image showing a finished wooden crate with a metal band.

Arrows indicate the sequential flow from Design to Material Selection, Cutting, Drying, Machining, Assembly, Painting and Coating, and finally to Packaging.
